INTRODUCTION

ArtBeton Contracting & Trading, LLC, provides only the best construction materials from the most trusted suppliers, to ensure the durability and stability of your projects. ArtBeton distributes a wide array of construction essentials including,

but not limited to concrete precast materials, waterproofing membranes and bitumen's, services and spare parts supply for hollow core concrete factories and other general materials supply for any kind of construction sites.

The company is committed to technology and innovation that we only choose the highest quality products and has passed international quality standards. ArtBeton is striving to succeed in the business by constantly devoting itself to the ever-changing customer expectations and delivering only the greatest and state-of-the-art products that would suit your business needs.

ArtBeton Contracting & Trading, LLC, offers a vast variety of construction essentials which are ISO certified and passed international standards.

Our main products are:

Civil construction works

Concrete precast materials supply

Waterproofing membranes & bitumen

Cementitious waterproofing materials

Services and spare parts supply for precast and hollow core concrete factories

ArtBeton company will provide you with years of experience and professional staff. All our team are passionate what we doing, because our slogan - Passion of Concrete

Civil works of KAHRAMAA Substation for private villa

SCOPE OF WORK

ArtBeton Contracting & Trading LLC, are ready to provide wide range of scope of work, such as trading or contracting.

As contracting department, we understand how important to listen our clients and be very attentive to each small detail.

We are happy to follow up contract from the begging and till the end. ArtBeton proudly presents our main directions such as supply and erection of hollow core slabs, soak away manholes, oncrete reinforced beams. We are ready for challenge with any kind of client requirements to find the cost-time-saving solution any time

Our trading department always in search 24/7 regime for the best goods and materials for our customers, Including quality and price. As modern company, we expand our business as a traditional and innovative ways. We supplying waterproof bitumen materials like APP or SBS mebrane, self-adhesive sealant tape, primer and mastic.

A wide range of precast accessories such as anchors, lifting sockets, loops, ring clutchs, recess formers and etc. - could satisfy any customer.

Also we supplier of spare part for hollowcore extruders: feed screws, sleeves, side plates and wear parts, rings, roller chaines, socket pins, diamond cutting blades and etc.

CONTRACTING

CONTRACTING

Supply and erection of hollowcore slabs

Hollowcore slabs derive their name from the circular voids or cores which run throughout the slab. The units have a smooth finish and maximum capacity of 2.3kn/sqm over 16m span. They are available in standart 1200mm width and in depths of 150, 200, 265, 320, 400 and 500mm. They can be used effectivley in all types of building providing a fast and cost effective structure.

Typical Applications include:

Flooring or roofing for single and multi-storey developments. The long spans like 16.5m (max. 25m) are ideal for most residential or commercial applications such as apartments, offices, factories, private villas and etc.

Wall panels - Hollowcore can be installed wither horizontally or vertically to provide an effective wall cladding system, often used with steel strucures

Benefits:

Hollowcore spans up to 25m, which minimises column requirements.

Factory production decreases dependancy on weather conditions and increses programme planning reliability

Eliminates the requirements for coslty excavation for ground floors, removes the needs for provision/compaction of infill material and provides an immediate dry working platform.

CONTRACTING

Erection and supply of concrete manholes.

Diagram below of a typical standard manhole construction
 All dimensions are variable

Manhole chamber rings are manufactured with tongue and groove joints designed to accommodate flexible jointing strip or cement mortar

Plugs are available to seal the lifting holes in manhole rings.

Manhole and soakaway depths are nominal, actual depths may vary. Where the height of construction is critical, units should be measured prior to construction.

Waterproof materials

NIKOBAND sealant tape

NIKOBAND is a universal self-adhesive sealing band. It is produced by placing a color reinforced aluminum covering on a waterproof self-adhesive bitumen layer. The protective film on the adhesive bitumen layer is easy to remove. The material is easy and convenient to use, and it bonds ideally to concrete, plaster, metal, bitumen, stone, wood and other surfaces. The sealing band is designed for sealing seams and joints, repairing cracks, waterproofing, and corrosion protection. NIKOBAND can be used in all climatic zones (as determined in Construction Codes and Regulation (SNIP) 23-01-99*).

Bitumen emulsion primer

TECHNICOL bitumen emulsion primer #04 is produced on the basis of bitumen dispersion in water. The material does not contain solvents, it has a neutral smell and is ideally suited for work in the premises.

Roofing mastic #21

TECHNICOL roof mastic #21 is a material that is completely ready to use, consisting of oil bitumen, modified by artificial rubber, mineral fillers and organic solvent. After drying, it forms a high-strength covering with a wide range of operating temperatures, which considerably increases the service life of the protected structures.

Waterproofing mastic #24

TECHNICOL mastic #24 is a ready-to-use material based on oil bitumen containing process additives, mineral fillers, and solvent.

TRADING

Threaded socket system

Made from all steel construction the swivel lifting eye is a heavy duty lifting device which enables the user to safely lift units from horizontal to vertical and back again if required. The pressure plate makes contact with the unit to generate even distribution on the concrete unit..

ADVANTAGES:

- Colour Coded system as defined in The German Association of Engineers (VDI) Guidance document for lifting systems (VDI/BV-BS-6205 April 2012)
- Matched to fit recess sizes of MFP & PNPL
- SWL matches socket loads classes of Threaded sockets
- CE Marked
- Serial Numbered

Swivel Lifting Eye

Wire Rope threaded lifting loops are manufactured from high specification wire. All loops are clearly marked with the manufactures details, the SWL and an individual serial number.

Standard Lifting Loop

Barrel lifting sockets with a cross hole are widely used in the application of Precast concrete construction, such as lifting beams wall and floor slabs. A reinforcement tail must be fitted to transfer the load into the concrete.

Barrel Lifting Socket

A thick walled flat end lifting socket with a crimped flat end with cross hole, that is designed for lifting. The lifting socket requires a reinforcement tail fitting to the socket to allow the forces to be transferred into the concrete.

Flat End Lifting Socket

SPARE PARTS

Extruder machine

We offer wide assortment of spare parts for equipment for producing concrete hollow core slabs by extrusion forming method of Finnish and Italian production. We also realize retrofit installation, adjusting of equipment and personnel training for work optimization of production equipment.

SPARE PARTS

Diamond cutting blade

900mm diamond floor saw blade is well cutting for asphalt, reinforced concrete road. Undercut protection segments ensures longer lifetime. Narrow U or key slot give a wider segment and longer lifetime. Wider U slot prevent clogging.

Fits to petrol cutters, bench, floor saw machines and extruders

Specification

Diameter:900mm, 1300mm

Segment thickness:4.8/5.0mm or others

Segment height:10/12/15mm

Inner hole:25.4mm, 50mm, 60mm or others

3. QUALITY POLICY STATEMENT

Quality Policy

ARTBETON CONTRACTING & TRADING LCC is fully committed to

Provide high quality products/ services with most economical means using value

Added engineering/ services to full satisfaction of our customer. In order to

Achieve this policy the following shall be established and complied with.

Identifying and fulfilling Customer requirements by providing excellent services

With highly motivated team.

Ensuring that the excellent execution techniques and procedures are adopted which will comply with the requirements of customer and all applicable regulations and requirements of the service provided.

Provide efficient services to meet customer and client satisfaction and needs through purchasing proper materials, maintaining equipment's and necessary infrastructure in high state of working condition.

Recruit highly qualified and motivated staff and improve the skills of employees through training in order to maintain the quality of services that meets the customers' expectations.

Optimize the performance and maintain strict monitoring of the services throughout its duration in order to meet the customer/client requirements.

To ensure continual improvement through identifying the weakness, eliminate the causes and implementing the steps to overcome the discrepancies which will empower the Company and Quality Management System.

4. CONFORMITY AND MANUFACTURER CERTIFICATE

Date: 10th January 2021

Ref #: AB-O-151-21

CONFORMITY LETTER

Dear Sirs,

We hereby confirm that all Precast Concrete Products (Barriers, Wheel Stoppers, Soakaway, Manholes, Road Gully, Boundary Walls. Etc.) will be manufactured and supplied by **ARTBETON Contracting & Trading L.L.C.** as one of Precast manufacturer here in Qatar – Doha. Our Precast elements will be produced in compliance to local QCS standard and International Standards Specification applicable for the precast elements.

Thank you for your valued trust in ArtBeton L.L.C. assuring a good business relationship with your prestigious company in future projects.

Worth Noting,

This letter of Conformity has issued by **ARTBETON Contracting & Trading L.L.C.** to confirm that we are supplying them the Concrete Grade mentioned above for precasting Concrete Boundary Walls elements for the same project.

Thanking you,

**Mr. Hamed Al Sherif **

General Manager
